Pragniv AI

CAPABILITIES OVERVIEW

Engineering Enterprise Value Through Autonomous Intelligence & Decision Science

A summary of Pragniv AI's core capabilities, proprietary accelerators, and operational client outcomes — for enterprise leaders evaluating an AI and decision intelligence partner.

Pragniv AI

Core Capabilities

A full-stack intelligence layer for the modern enterprise — from foundational data infrastructure to autonomous agentic workflows, engineered, governed, and production-ready.

GENERATIVE AI

Generative AI & Agentic Workflows

Multi-agent systems that reason, plan, and act across enterprise processes with human-in-the-loop governance.

DATA ENGINEERING

Enterprise Data Foundation

Modern lakehouse and streaming architectures unifying fragmented systems into a governed source of truth.

DECISION SCIENCE

Advanced Analytics & Decision Sciences

Predictive and prescriptive models tuned to enterprise KPIs, from demand sensing to network optimization.

MLOPS & GOVERNANCE

MLOps, LLMOps & AI Governance

Production-grade model lifecycle management with monitoring, drift detection, and compliance controls.

4.2x	2.4M+	99.4%	35+
Faster Decision Latency	Automated Decisions Daily	Model Reliability	GenAI Implementations

Proprietary Accelerators

Pre-built, configurable IP that compresses implementation time by up to 40%.

Sense™

Pragniv Sense™

Real-time signal detection across demand, risk, and operations.

Flow™

Pragniv Flow™

Agentic workflow orchestration with built-in audit trails.

Core™

Pragniv Core™

The unified data and model backbone for legacy-to-AI integration.

Pragniv AI

Client Impact

Operational outcomes from production deployments.

CLIENT	CHALLENGE	SOLUTION	OUTCOME
Veloris Retail Retail & CPG	Fragmented regional inventory systems across 1,200+ stores.	Pragniv Sense™ real-time demand sensing with autonomous replenishment.	+18% Inventory Optimization
Valoris Bancorp BFSI	Multi-day fraud investigation backlogs at peak volume.	Agentic fraud triage workflow on Pragniv Flow™ with explainability.	3.6x Faster Investigations
Curagenix Health Healthcare	Siloed patient data limiting readmission risk visibility.	Privacy-first risk stratification on Pragniv Core™.	99.4% Model Reliability

Industry Focus

RETAIL & CPG

Demand & Pricing

Hyper-personalized demand sensing and dynamic pricing engines.

FINANCIAL SERVICES

Risk & Compliance

Real-time fraud detection and automated credit risk scoring.

SUPPLY CHAIN

Network Optimization

Autonomous replanning agents that respond to disruption in real time.

HEALTHCARE

Clinical Intelligence

Patient risk stratification with privacy-first, HIPAA-aligned architecture.
